

USE CASE · LOSS PREVENTION

Turn suspicious moments into reviewable incidents.

Daytime shoplifting patterns and after-hours events land in one calm inbox — with source, time, camera, confidence, and evidence.

WHAT YOU GET

01

One inbox, two streams

Daytime shoplifting review and after-hours alarm review in one queue, not two systems.

02

Evidence, not alerts

Every incident includes the camera, timestamp, confidence, and a clip you can open in one click.

03

Close-the-loop status

Mark incidents confirmed, false positive, or unclear. Review process stays clean over time.

HOW IT WORKS

WATCH

AXWEL monitors zones, exits, registers, and after-hours motion across your existing cameras.

→

FLAG

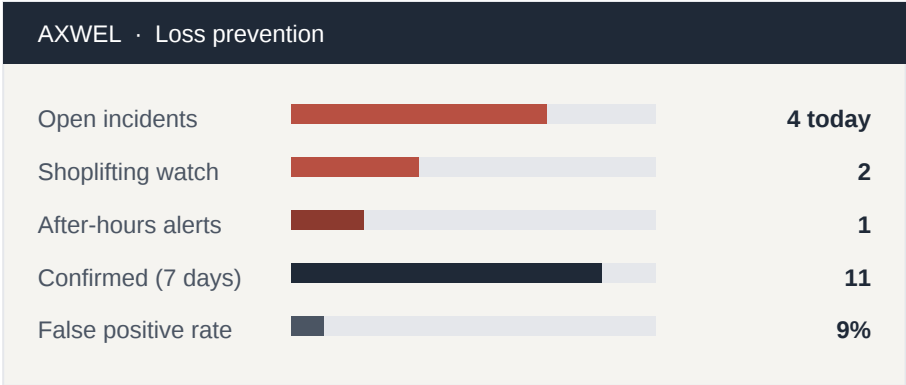

Events tied to shoplifting patterns, restricted zones, or alarm triggers surface with confidence.

→

REVIEW

Owners open the inbox, mark outcomes, and AXWEL tunes thresholds to your business over time.

WHAT IT LOOKS LIKE

What this gets you

- Daytime and after-hours in one review flow
- Each incident has source, time, camera, confidence
- Outcomes marked and tracked over time
- No need to live in the camera system

See it against your cameras.
